Software Developer (SaaS/Web)

JEREMY GERVAIS

(647) 896 0691 | jeremygervais@hotmail.com | www.jeremygervais.ca | www.linkedin.com/in/jeremy-gervais

Profile: *Full-stack web developer with 6+ years of experience building secure, scalable web applications using React, Vue, Node.js, and TypeScript in the authentication and passkey space. Proven ability to collaborate cross-functionally, ship customer-facing products, and translate business requirements into reliable technical solutions. Background across multiple industries brings strong communication, UX awareness, and stakeholder alignment.*

EXPERIENCE

FRONTEND DEVELOPER
LoginID
02.2021 – PRESENT; Toronto, ON

- Eliminated developer dependency for marketing content updates by migrating a static HTML site to a custom SPA + CMS tailored to marketing and product workflows
- Built product demos and proof-of-concepts integrating core platform APIs with partner technologies, supporting and securing multi-million-dollar partnerships
- Implemented multi-factor authentication for an OAuth 2.0 service, including SMS/email OTP, FIDO2, and QR-based short-code authentication flows
- Built and maintained GitLab CI/CD pipelines to automate linting, unit tests, end-to-end testing, and security audits, improving code quality and release reliability.
- Integrated CRM and analytics platforms including HubSpot and Google Analytics to support marketing insights and user tracking.
- Acted as a cross-functional liaison between engineering, product, marketing, design, legal, and infrastructure teams
- Designed wireframes and high-fidelity user flows to validate requirements and accelerate feature development
- Wrote and maintained unit, integration, and end-to-end tests across frontend and backend services, ensuring the reliability of our end product
- Contributed to the maintenance of product documentation to ensure accuracy and alignment with evolving features

FULLSTACK DEVELOPER (Freelance)
03.2020 – 02.2021; Toronto, ON

- Developed a parking permit web application with a RESTful backend to automate vehicle registration and authorization for a security services client
- Migrated a small business website from GoDaddy to WordPress (Elementor), enabling improved SEO, form management, and brand control for non-technical stakeholders
- Designed UI/UX flows for an early-stage travel application concept, focusing on usability and visual clarity
